Country Loaf

Prep Time: 3 days | **Cook Time:** 45 mins | **Servings:** 1 loaf **Contributor:** Patrick

Description

A brief, 1-2 sentence story or description of the dish. Why is it special?

Ingredients

- ☐ 500 grams **bread flour**
- ☐ 350 grams **water**
- ☐ 100 grams **active sourdough starter** (see Day 1 instructions below)
- ☐ 12 grams **sea salt**

Instructions

Day 1

1. **Prepare the levain:** In a jar, set aside 5 grams of mature sourdough starter. To it, add 50 grams of water and 50 grams of flour.
2. **Mix well:** Mix the above ingredients together well, so that everything is well incorporated. There should be no dry spots of flour.
3. **Let ferment:** Loosely cover the jar, and let sit at room temperature (72 to 75 Fahrenheit) for 10 hours.

Day 2

1. **Hydrate the starter:** In a large bowl, mix together the water and starter. Try to dissolve any large clumps of starter in the water. The water should become frothy.
2. **Mix the dough:** Add the flour to the bowl, and mix thoroughly. Keep mixing until no more loose flour is visible. Be sure to scrape down the sides of the bowl as you go.
3. **Let rest:** Cover the bowl with a plate (or other lid), and let the flour hydrate for 30 minutes.
4. **Add the salt:** Sprinkle the salt over the dough. With a wet hand, squeeze and fold the dough so that the salt is evenly distributed and no longer visible.

Day 3
